

Enhance Security, Optimize Workflows with Judy Control Center

Meet Judy (and get your team working safer and smarter).

Judy is your virtual cybersecurity assistant, and the heart (and brains) of our all-in-one platform. Built using the latest AI and machine-learning technology, Judy leverages a robust set of features to protect your brand, your customers, and your bottom line.

Built to provide a solid cybersecurity solution for small and medium-sized businesses, Judy is a light but powerful solution that's easy to use and manage. Her strength in management comes from the integration of Judy Control Center.

Judy Control Center platform is designed to maximize the benefits of working with Judy, and empower users to effectively harness Judy's intelligence, make informed decisions, and optimize their security strategies. Judy Control Center features a user-centric design that simplifies access to insights, boosts security, and optimizes workflow efficiencies.

Comprehensive Insights

Real-time insights and reporting, providing invaluable data on end-user behavior and threat incidents allowing for informed decisions and proactive measures.

Multi-Tenant Design

Multi-tenant design balances usability and security, aiding efficient cybersecurity management.

Actionable Response

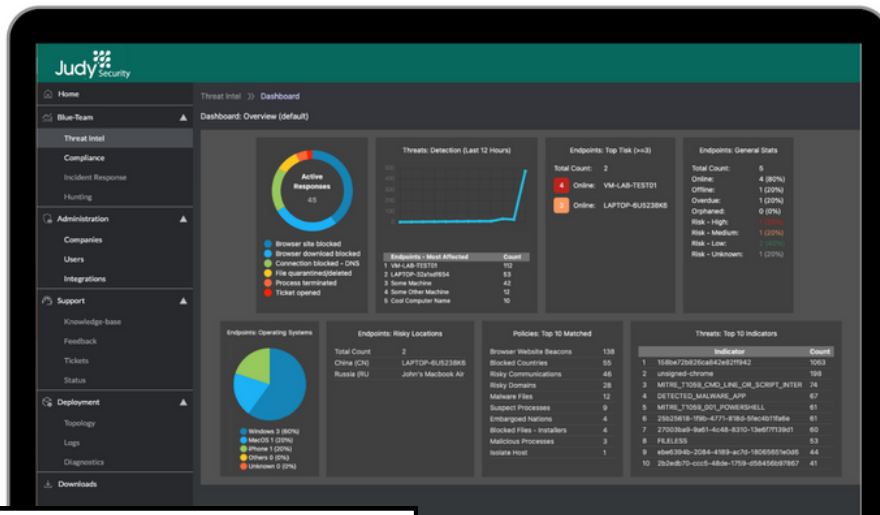

Transparent insights into event responses foster trust, enabling data-driven decision-making for confident client protection.

Advanced Threat Hunting

Harness sophisticated data to elevate incident awareness, empowering users to navigate the dynamic threat landscape with real-time situational awareness.

Seamless and Simplified Cybersecurity Management

Judy Control Center offers advanced multi-tenant reporting, analytics and guidance, empowering users with seamless cybersecurity management. Judy Control Center simplifies the acquisition of valuable insights for partners and customers without unnecessary complexity, enabling them to enhance security and optimize workflow through detailed threat analysis.

Cross-Platform Compatibility

Judy understands that businesses use a variety of devices and systems. Judy Control Center offers seamless navigation across various platforms, including Windows, MacBooks, Chromebooks, Android devices, and iPhones, ensuring compatibility with your clients' diverse environments.

In-Depth Telemetry

Judy Control Center provides comprehensive and detailed data about security operations and performance, facilitating efficient troubleshooting. With this information, users can implement improvements where needed in their clients' security architecture.

Enhanced Cybersecurity Management

Judy Control Center gives you access to everything your business needs to start working safer and smarter for less.
