

# Build a Cybersecurity Foundation with Judy Essential.

Meet Judy  
(and get your team working  
safer and smarter).

She's your virtual cybersecurity solution, and the heart (and brains) of our all-in-one platform. Built using the latest AI and machine-learning technology, Judy leverages a robust set of features to protect your brand, your customers, and your bottom line.

**Built to provide a solid cybersecurity foundation for even the smallest businesses, Judy Essential is just that: essential cybersecurity.** A light but powerful solution that's easy to use and manage, it delivers everything you need to secure your business (and nothing you don't), including live customer support to help when you need it most.

**60%\* of SMBs close within six months of a breach.**  
**Don't let yours be one of them.**

Judy Keeps Your Business (And Your Customers)  
Safe from the Most Common Cyber Threats.

PHISHING ATTACKS

COMPROMISED PASSWORDS

MALWARE & RANSOMWARE

# Judy's All-in-One Platform Makes Security Easy.

Judy's Essential package gives your business an instant security posture to protect your brand, your team, your customers and your bottom line. The platform is easy to deploy business-wide right away—just have your team log in using Judy's secure, passwordless authentication, and she'll go right to work.

## Protecting Your Passwords

Judy creates and stores all of your team's login information in her private, encrypted vault, so you never have to remember another password. Regular audits identify weak or reused passwords so you can be proactive about keeping your credentials secure.

## Watching Your Devices

Judy's endpoint detection and response capabilities keep a watchful eye over all of your team's devices with powerful, next-generation threat intelligence to secure your team's devices and stop malware from infecting your network.

## Guarding Your Email and Browsers

Judy evaluates all links at the domain-name server (DNS) level to filter bad or unwanted content (that can be customized for your organization). This allows you to block phishing attempts and malicious links so you can access the internet with confidence.

## Keeping it All Secure

Judy keeps unauthorized users out of your company's data and systems by requiring secure multi-factor authentication through Judy's mobile app to access login credentials. Users can choose to go passwordless with biometrics or PIN access.

## Get All-in-One Cybersecurity for Less Than \$1 Per Day.

Judy Essential gives you access to everything your small or midsize business needs to start working safer and smarter for less:  
**DNS Filtering | Secure Authentication | Password Manager | Endpoint Detection & Response (EDR) | Judy Mobile App\***

*\*Judy is compatible with Windows, Mac, and Chrome. Mobile App available for Apple and Android.*
