Judy Security

Get compliant. Stay compliant. Judy makes it easy.

Meet Judy
(and meet compliance).

She's your virtual cybersecurity solution, and the heart (and brains) of our platform. Judy's automated compliance management and reporting feature provides one-click access to best-in-class tools to easily map to frameworks including: SOC2, NIST, CMMC, PCI and more. With Judy on your side you'll be able to win and retain business, and meet audit and reporting requirements for a fraction of the cost and effort.

Level-up Your Security Posture.

Go beyond one-time compliance. Assess and remediate within a living program. Confidently report with one click.

Pass Audits with Ease.

Quickly achieve compliance for auditors, customers, stakeholders, and your BOD faster than any other approach.

Boost Efficiency by 50%+

Crosswalk all your compliance frameworks in seconds. Streamline management, audits and reporting forever.

Grow and Retain Revenue.

Use cybersecurity as your new competitive advantage. Win more business faster and retain customers with less effort.
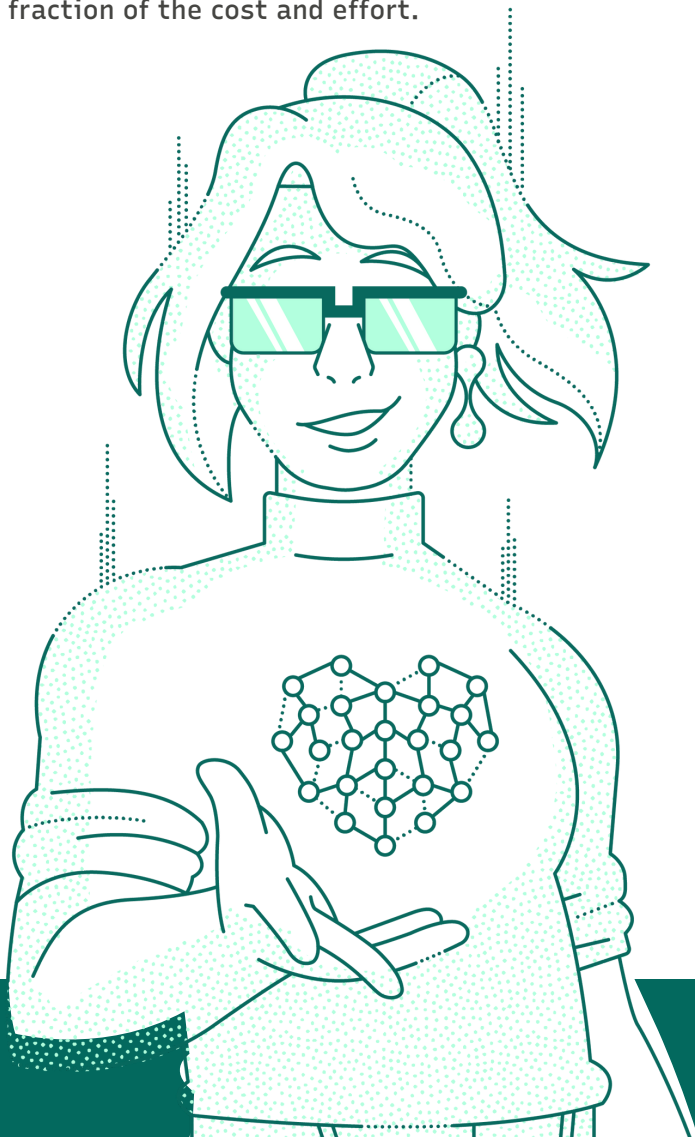

Judy makes it easy to build, manage and report on cybersecurity and compliance.

Audit Manager

Audit Manager streamlines your cybersecurity and compliance audits, saving valuable time and money for your organization and makes cybersecurity compliance easy.

- Assess the current state of your compliance
- Compile all necessary artifacts and documentation in a single location
- Fulfill all required auditor requests for compliance proof and evidence
- Eliminate inefficient, manual efforts and excel documents from your audit process
- Assess and mitigate risks at the control level
- Simplify processes with built-in guidance, documents, and templates
- Speak a risk language your executives and key stakeholders understand to drive better risk-based business decisions
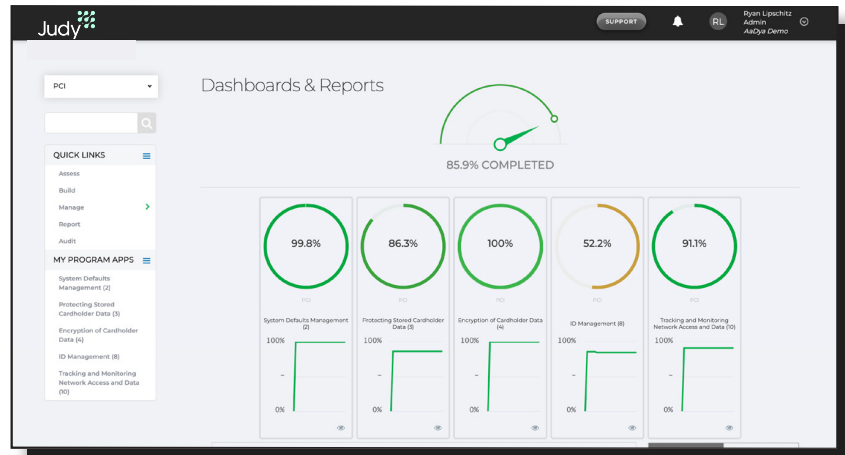

Risk Manager

Risk Manager saves you money, simplifies and automates processes, and ensures you always have accurate, real-time insight into your evolving, complex risk landscape.

- Gain insight into all your risks
- Assign a risk rating
- See which of your existing frameworks, controls, and sub-controls are effectively addressing risks
- Get insight into where you have gaps in your risk management processes
- Document risk title, risk owners, date identified, response due date, response plans, inherent and residual likelihood/impact to your organization
- Create customized reports and easily create a risk register

Let Judy help you become a compliance superstar - for a fraction of the cost and effort.

Save hundreds of hours of manual administrative work

Achieve unprecedented visibility and control

Confidently report your status to your executives, board of directors and auditors
